WEDDING BELLS

The marriage of two well-known young people of Empress, took place on Wednesday evening at 8.30, the contracting parties being John McNeill and Margaret Miller Sharp, eldest daughter of Mr. and Mrs. John Sharp. The marriage license having been issued in Saskatchewan the ceremony took place across the Saskatchewan border at the home of Mr. and Mrs. E. J. Lacy, Rev. G. G. Pybus officiating. Miss Perdita York acted as bridesmaid and Mr. Alex. McNeill as groomsmen, and the ceremony was witnessed by a small party of guests in addition to members of the bride's family. After congratulations and best wishes had been extended the party moved to the Sharp residence where a very dainty wedding luncheon was served and the remainder of the evening spent in singing and violin music. Soon after lunch a large party of senders appeared with a medley of sounds tearfully and wonderfully made, and the bride and groom were called upon to receive congratulations from the jovial company.

The bride was attired in a very pretty dress of pearl crepe-de-chene silk. The groom's gift to the bride was a pearl necklace and a pearl crescent. The bridesmaid and scarf plu to the groomsmen. Mr. and Mrs. McNeill are well known throughout the town and district and their many friends will extend best wishes for their future happiness and prosperity.

A Detroit despatch announces that Henry Ford has reduced the price of his cars on an average of \$142.00 per car. It is declared that a slashing of prices is only method to bring material costs down to pre-war range.

Rex vs. Mrs. Anna S. Madson. Charge, "Did contribute to the neglect of her children." Case dismissed on account of insufficient evidence.

United Church

11 a.m.—Rally Day in the Sunday School. A special Service entitled "Bring them all in" will be followed with special music and a short address. A special Rally Day offering. Let us make it the best rally yet.
7.30 p.m.—Public worship. Strangers welcome. Choir practice, on Friday evening at the Manse.

WHO MAY VOTE

Every person (not an Indian and not disqualified by official position, crime, or otherwise) who is:

1. Twenty-one years of age, and
2. IS NOW A BRITISH SUBJECT by birth or personal naturalization and who
3. Has resided at least one year in Canada and two months in the electoral district where he seeks to vote, preceding the issue of the writ of election (April 29, 1920).

NOTE—

(a) Any British-born woman, married or unmarried, is entitled to have her name placed on the Voters' List without a judge's certificate regardless of the nationality of her husband or father, provided (1) she has the necessary age and residence qualifications, and (2) she has NOT been personally naturalized as a citizen of a foreign country.

(b) Any married woman who was born on the North American continent and whose husband is now, or, if deceased, at the time thereof was a British subject by birth or naturalization, must appear personally before a Judge and from him receive a certificate before being entitled to have her name placed on the Voters' List.

(c) Any man or any unmarried woman whose British-born or was born on the North American continent and who obtained naturalization through his or her parents may have his or her name placed on the

Voters' List without a Judge's certificate.

(e) Any man or unmarried woman of other than British origin and born off the North American continent, who obtained naturalization through his or her parents, must appear before a Judge for a certificate as stated above.

4. Every Indian who is not ordinarily resident on an Indian reservation and qualifies under Sections 1, 2, 3.
5. Every Indian, wherever he resides, who has served in the Army, Navy, or Air Forces of Canada in the late war, and who produces his Certificate of Discharge to the Registrar to get his name on the Voters' List, and to the Deputy Returning Officer at the time of polling.

The Ballot question:

Shall the importation and the bringing of intoxicating liquors into the Province be forbidden?

CARD OF THANKS

We wish to extend our sincere thanks to all those who so kindly assisted us by helping and furnishing flowers during our recent bereavement.
Mr. and Mrs. John Northeast.

In New Premises next door to Brodie's Store

TO My Many Customers:

I Wish to Make This Statement---

I am going to ask each and everyone to whom I extended credit to make arrangements to settle their accounts as soon as possible, so that I can again obtain credit myself for the future.

Let me say to you that I have to pay cash for at least half of my purchases. For instance:

All Oils and Greases, including Gasoline, are cash.

Barbed Wire, is strictly, 30 days nett.

Harness Goods, of all kinds, are 30 days nett.

Bedding, Springs, Mattresses are 30 days net.

Freight, Cartage, Express, Telegrams and Wages are

Cash

So that with this explanation, do you see the position, and unless I can have your co-operation in this respect I will have to discontinue the Credit business.

Our Game Laws

There are hunters and hunt-
ers. One class is desirous of
conserving game, appreciat-
ing the fact that a country's
wild life is an asset invaluable
in its attractiveness and prac-
tically incapable of restoration
once destroyed. We need only
revert to the stories of the
prairies, written in the
event of the last century,
when travellers counted, at
rather estimated the buffalo in
millions, and extermination in

the wild state seemed all but
impossible. However, a few
years and the wild buffalo were
no more. The real hunter wants
no extermination; and he is the
friend and supporter of every
possible law of conservation.

There is another class of hunt-
er. He is the man who thinks
it smart to break and dodge the
laws. He cares nothing for the
future and lives for mere self
gratification.

There are citizens—plenty of
them—who imagine that full
responsibility for the enforce-
ment of laws rests upon the
shoulders of the officials of the
province. Let us assure our
younger citizens that there is
nothing that gives more heart
to conservation officers, striv-
ing to enforce the law, than a
hand from law-abiding citizens.

There are many shooting
lodes in Manitoba where a
high code of honor prevails.
And for the law-breakers honest
sportsmen should show no
consideration. In other words,
where game laws are willfully

Higher Prices for Cream

Farmers: Prices have again advanced and are much
higher than a year ago, and with the feed situation
very favorable you have the opportunity to make
your cows bring good returns. We always pay full
market prices, and our service will please you.

The Daredevil of the Skies

The 'Great Air Robbery'

Staged in the Clouds

A Thriller in which the Sky is the Limit

A drama of the air-planes which has
never been approached for sheer
thrill—which can never be imitated
for daring.

If you want to know "how it feels"
to change planes in the air, ride an
airplane wing with Locklear, the
bravest of the brave.

See the woman you love snatched
from your arms by a bandit of the air
and swept aloft a mile in the sky! Go
after her! Leap from the rope ladder
she drops—climb it's dizzy height—
bring her safe to earth! Its the pic-
ture that makes all the other pictures
look like milk and water.

Friday and Saturday
September 24 and 25
Grand Theatre, Empress

broken, every true sportsman
should not shrink from assist-
ing the game guardians in
bringing culprits to justice.

Particularly with respect to
the open season for prairie
chickens, the ease with which
their haunts may now be reach-
ed, means that ten hunters will
be in the field where there was
one seven or eight years ago.
The bag limits, which are on
trial this season, may stop a
desamating slaughter. Assured-
ly, any general violation of the
restrictions would prove dis-
astrous.

It is, therefore, up to every
sportsman to observe the law
and endeavor to enforce the
law to the limit.—Tribune, Win-
nipeg.

Expect Car Shortage

Advice from the Deputy Min-
ister of Agriculture is that the
Canadian Pacific Railway Com-
pany has a large surplus of
cars awaiting loading. In view
of the heavy grain crop to be
shipped there is a prospect of a
car shortage later on in the
season.

Farmers and grain firms are
urged to ship as much grain as
possible to the head of the Lakes
during the present month. The
Department of Agriculture,
however, disclaims any responsi-
bility from advising people to
sell their grain at the present
time. This is a matter which
each one must decide for him-
self.

Mrs. H. H. Reddy, and son
Harry, made a trip to Swift
Current, on Saturday.

Don't forget the "Count-on
Me" Bazaar, Saturday, after-
noon, at 2.30, next door east to
the post office. We count on

TAX SALE

Sale of Lands in the Municipal
District of Acadia, No. 241 for
Arrears of Taxes

Notice is hereby given, that certain lands
in the Municipal District of Acadia No.
241 will be offered for sale for arrears of
taxes and costs on Friday, the 30th day
of October, at the hour of one o'clock in
the afternoon in the Acadia Valley Hall,
at Acadia Valley, Alta.
And that a printed list of the said lands
may be obtained on application to me.
And further, take notice that unless the
taxes and costs be sooner paid, I will
proceed to sell the lands for taxes at the
time and place mentioned in this adver-
tisement.

D. M. GRUBMAN,
Secretary-Treasurer

A. E. Galloway, has recently
completed a road diversion in
the north approach of the
South ferry. This will enable
teams hauling loads of hay, etc.,
to pass around the scow which
will be lying, hauled up on the
approach during the winter.

Archbishop Matheson Home
from England:

Mr. J. A. Tombs left on
Tuesday, for a trip to Calgary.
Over three hundred names
are entered on the voters list
for the referendum. J. Cusack
is registrar.

The Liquor Referendum
will take place October 25.
Every man and woman should
see that their name is placed on
the voters list.

Death of Wesley Fayette Vaughan

Another of Social Plains pioneer residents passed away on Thursday September 16th, in the person of Wesley Fayette Vaughan. Mr. Vaughan was born in New York state on June 8th, 1858, and emigrated to this country in 1912. For some time he had been troubled with cancer which became serious during the last few months causing him much painful suffering. He leaves to mourn his loss, his sorrowing wife, two sons, William and Ray and two daughters, Mrs. F. M. Tucker and Mrs. H. H. Tucker of Social Plains. The funeral took place on Friday, from the family residence and burial took place at Empress cemetery. The sorrowing family have the sympathy of the community in their great loss.

Women's New Status

Ratification by the legislature of Tennessee of the amendment to the constitution of the United States extending equal suffrage to women was noteworthy in that it made the 36th State to approve of the amendment, and consequently made possible the promulgation of the new constitution, a change as binding upon the whole nation. As a result between 15,000,000 and 20,000,000 women will be added to the list of qualified voters in the presidential elections next November. In other words, there will be in the neighborhood of 40,000,000 eligible voters in the United States, a number unequalled in any other country.

What effect this large enfranchisement of new voters will have on the fortunes of the Republican and Democratic parties is difficult to say. The probability is that in this first election the women will, as a general rule, vote the same ticket as their men folk, but as the years go by and women develop an aptitude for public affairs and a distinct political consciousness, it is altogether likely that marked changes will be effected in party policies and attitudes.

The innovation will be for the good of the country and the world, because, naturally, the woes of the people of other parts of the world will appeal more strongly to women than they appear to have done to the big financial and commercial interests of the United States damaged by the peace treaty and the League of Nations. There will probably be less selfishness and more humanitarian feeling in American politics of the future.

The enfranchisement of millions of women will also, in all probability, have the effect of definitely settling the much vexed question of prohibition and assure the retention of prohibition of the liquor traffic as a permanent policy of the United States.

In the extension of full citizenship rights to women, Canada led the United States, first the provinces and

then the Dominion taking this advanced and enlightened action. In this country, too, this undoubtedly means the deathknell of the liquor traffic. In other respects the effect of the entry of women into politics is distinctly noticeable. Greater attention is being paid by governments to the problems of health and along many lines making for human betterment in moral and social conditions, and, in particular, in the direction of legislation establishing and protecting the rights of women, working girls and children generally.

So, too, the presence of women in the legislatures of Manitoba, Saskatchewan and British Columbia, and almost certainly in the next Dominion parliament, as well as upon municipal councils and school boards, is bringing new angles to the consideration of public matters of far-reaching importance. To an increasing extent in the future, business in the government and the practical side of administration will be softened by attention being devoted to more sentimental and aesthetical considerations.

As a consequence of the participation of women in public affairs there must come, as there has come from their general entry into business, a greater self-reliance on the part of the women themselves. They will need it, because, as they increasingly engage in occupations formerly regarded as the exclusive prerogative of the men, it is inevitable that the difference paid by men to women will become less in evidence. This tendency, regrettable as it is, is already apparent in small matter, as, for instance, the growing reluctance of men to give their seats to women in crowded cars or other places of assembly, or to giving them precedence in a crowd. Women will miss these little old-time courtesies, and it is a pity that they should pass, as already there is too little gentleness and courtesy in this matter-of-fact, work-a-day world. But it is a price that, apparently, must be paid in the new age of absolute equality between men and women.

It is to be hoped, however, that women will still inculcate in their men a high regard and respect for gentleness and courtesy towards women, and that all men will strive to maintain such an attitude towards women even in the stress, strife and turmoil of business and political life, and that the women will endeavor to be worthy of such regard from their men, so that, with all the undoubted advantages of this new era the world may not lose all the old chivalry of the past.

Minard's Lintment For Dandruff.

Salmon Plentiful

The pack of scientific salmon this year on the Fraser River will be the largest since 1916. The run of salmon of all kinds in northern British Columbia is also exceptionally good this year.

Away With Depression and Melancholy—These two evils are the accompaniment of a disordered stomach and torpid liver and mean wretchedness to all who they visit. The surest and speediest way to combat them is with "Parment's" Vegetable Pills, which will restore the healthy action of the stomach and bring them back. They have proved their usefulness in thousands of cases and will continue to give relief to the suffering who are wise enough to use them.

A Monster Zeppelin

According to experts, the newest Zeppelin type to be constructed will be capable of carrying a load of sixty tons, and with 500 passengers, cover a distance equal to three times across the Atlantic without having occasion to refuel.

"My father objects to you because he says that you are unable to meet your creditors. Is this true, Algy?" "No, Algy, my honor! I meet them wherever I go."

Mineral Wealth of Quebec

Discoveries in North Country Are Becoming Richer

H. L. F. Blake, representing several English syndicates, who has been exploring Chibougamau and Northern Quebec with a party arrived recently in Montreal on his way down to the North Shore to make further explorations in Ungava. Mr. Blake reports that the mineral discoveries in the north are becoming richer and richer on each occasion he visits the interior of the country, and predicts that the day is not far distant when the large steel interests will look to Northern Quebec for their raw material. The enormous water powers will supply coal in the production of iron and steel and will make Quebec one of the richest parts of the Dominion, if not of all America, from the mineral point of view.

Minard's Lintment For Sale Everywhere.

Thousands Found Positions Since the beginning of the year the Alberta government employment bureau have placed over 20,000 men and women in positions. Last month, out of all applications from men and 1,796 from women they were successful in placing 5,480 men and 1,635 women.

CONSTIPATED CHILDREN

Children who suffer from constipation, indigestion or any of the other ailments due to a disordered condition of the bowels will find prompt relief through the use of Baby's Own Tablets. The Tablets are a mild but thorough laxative which can always be relied upon to regulate the bowels and sweeten the stomach. They are absolutely safe and are sold under a guarantee to be entirely free from opiates or other injurious drugs. Concerning them, Mrs. Thomas A. Boston, Lake Baker, N.B., writes: "I am pleased to state that Baby's Own Tablets were of great help to me when my baby was suffering from constipation." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

A fisherman has plenty of time in which to think out scaly stories.

The young man who praises the poetry of his young lady acquaintance is beyond his years.

Worms are encouraged by morbid conditions of the stomach and bowels, and so subvert. Miller's Worm Powders will alter these conditions at once and immediately and will sweep the worms away. No destructive parasite can live in contact with this medicine, which is not only a worm destroyer, but a health-giving medicine most beneficial to the young constitution, and as such it has no superior.

More Valuable Crop Than in 1915—C. E. N. With general manager of the Canadian Farm of Commerce, says that the value of this year's crop on the prairies will be greater than it was in 1915, although the yield will be somewhat short of that bumper year.

Second Crop a Record—The second crop this season of alfalfa in Southern Alberta is making splendid progress and promises to be a record crop on top of a record first cutting.

Mr. Watts—"Are you anxious to earn a good dinner, my poor man?" "Tramp—" "Not half as anxious as I am for the dinner."

Minard's Lintment Co., Limited. Dear Sirs,—I had a bleeding tumor on my face for a long time and tried a number of remedies without any good results. I was advised to try MINARD'S LINTMENT and after using several bottles it healed all my troubles. I am, Sir, DAVID HENDERSON, Belleisle Station, Kings Co., N. B. Sept. 17, 1924.

Not There

"Ernest," said the teacher, "Tell me what you know about the Mongolian race."

"I wasn't there," explained Ernest hastily, "I went to the football game."

Every cow in Belgium must wear ear-rings. Breeders of cattle are obliged by law to keep an exact account of the animals raised by them, and the ring, on which is engraved a number, is fastened to the animal's ear to prevent substitution of one animal for another.

No, the average man doesn't understand classic music — and he is proud of it.

In proportion to its size, the bee is 30 times as strong as a horse.

W. N. U. 122

PURITY - QUALITY - ECONOMY

With the increased cost of labor and materials due to war conditions, it is not reasonable to suppose that a really first class baking powder can be made and sold at the old prices. Rather than sacrifice the quality of

MAGIC BAKING POWDER

we found it necessary to make slight increases in price during the war period. Even though Magic Baking Powder may cost a few cents more than the ordinary kinds it is still by far the most economical baking powder on the market to-day when purity, strength and leavening qualities are taken into consideration.

Faith Cures

Sensitiveness of the Mind A Determining Factor in Respect

To Health
There is nothing new in the cures reported through the medium of the "bleeding sacred statues" at Templemore, Ireland. St. Anne De Beausabre, Quebec, is a shrine at which thousands are said to be cured every year. These are faith cures, and for certain ailments, such cures are considered strange nor unusual. Reversely, a perfectly well man may be made to feel ill by being told that he looks ill and must be ill. The sensitiveness of the mind is often a determining factor in respect to sickness and health. But the only sure way of curing disease is to consult a competent doctor and to follow his advice and the word "doctor" does not necessarily mean the medical profession only—Calgary Herald.

50,000 Men Wanted

Before next month this number are wanted to step up and have their corns removed by Putnam's Corn Extractor—it's painless—safe—sure. Use only "Putnam's," it's the best, 25c at all dealers.

There are ten times as many Jews in the United States as there are in Great Britain.

New York State has supplied more than one-third of all the vice-presidents of the United States.

SAVE the HORSE

Horses can only do so much work—make the loads as easy as you can.

IMPERIAL Mica Axle Grease

Helps the horse by preventing friction between the wheel and the hub. It coats the hub with a smooth hard surface—lubricates thoroughly. Takes the strain off harness and horse.

IMPERIAL Eureka Harness Oil

Penetrates into the harness—makes it waterproof—repels insects—keeps straps and tug strong and pliable. Prevents cracking and breaking of stitches. It is a pure mineral oil, free from acids and cannot become rancid.

FAR FAMED PRODUCTS

Imperial Mica Axle Grease and Imperial Eureka Harness Oil are widely known everywhere. No other products can be obtained at so low prices.

Fine Buildings for Fine Farms

YOU have modern machinery, modern equipment, a real up-to-date modern farm—BUT—how about your buildings? Are they as modern as your equipment? Do you house that expensive machinery—or leave it to the mercy of rains, sun, wind and rust? How about your stock? Do you take a chance and house them in unsanitary, dark, damp barns that decrease their efficiency and production? How about your good wife and yourself? Are you any less important than any or all of these?

Fine Buildings Make Fine Farms

The time was never more opportune to realize the long-needed improvements—new buildings, additions, repairs—NEW IDEAS. Now on the threshold of a big crop with wheat at a high price, with the money on the participation certificate coming in—surely the time was never better set when the hard-earned hard-fought-for contents of a real home can be rebuilt. Your farm should have buildings worthy of its owner and its production. Make the most of your good wife, a reality, not mere content and a home-like atmosphere to the farm by building now.

Consult Your Lumber Dealer

He is an authority because he has at his command a NEW IDEAS. Now on the threshold of a big crop with wheat at a high price, with the money on the participation certificate coming in—surely the time was never better set when the hard-earned hard-fought-for contents of a real home can be rebuilt. Your farm should have buildings worthy of its owner and its production. Make the most of your good wife, a reality, not mere content and a home-like atmosphere to the farm by building now.

Build Better Buildings—Build Now

This Announcement is issued by the Lumber Manufacturers of Western Canada.

BUILD NOW

Comes already sweetened

Its own sugar is developed in the baking. It solves your sugar problem among ready-to-eat cereals.

Grape-Nuts

Order a package from the grocer. Its flavor appeals and there is no waste.

Good Roads Are Of Inestimable Value To the Rural Districts

The highways of a country are one of its nation's most important assets and play a large part in colonization and land settlement. The construction of good, serviceable highways, next to the buildings of railroads, is probably the chief factor in increasing the prices of land, while adequate marketing facilities, in the way of good roads, is an inevitable part of agricultural progress and prosperity.

A high grade of public development, with a progressive and wide-awake policy of maintenance and extension, has a decided bearing on immigration, and the building of these facilities, in the eyes of intending farming settlers, seriously detracts from the attraction of the country. Again, it must be remembered that Canada's tourist traffic is an important and extensive feature of national wealth, and constitutes one of the principal sources of the country's revenue. As a great part of this touring is done by automobile, and this mode of travelling is increasing yearly, it is readily seen that the provision of good trunk roads is necessary in order to keep up the traffic and foster commerce.

That Canada is alive to the necessity and advisability of maintaining substantial roads and carrying out annually a program of extension, is evinced by the series of Federal and Provincial grants to this end. Expenditure on Canadian highways for the last five years has amounted to \$20,000,000, and the program at present being carried out will result in the disbursement of \$40,000,000. Besides the active local road-building, county, municipal or provincial highway association exist for the co-

operation of these smaller bodies within the province and the furtherance of the provincial program. Constructively, an interprovincial convention is held at some central point, and is attended by the various ministers of public work, highway commissioners, road-building experts from both sides of the line, where papers are read on all phases of road construction, ideas are exchanged, policies are devised and progressive projects advocated.

Just how important Canadian highways are to the people of the Dominion may be judged from the fact that they already aggregate 95,000 miles of the land appropriated for the construction, together with the improvements carried out thereon, amount in value to no less than \$750,000,000. It has been estimated that for every mile the travelling public journeys on the railroads, it travels two miles on the highways. Canada's roads average one mile for every 22, whereas in the United States it is one mile for every 55.

The absolute necessity of good roads is so clear that the farmer may easily reach that market, is the biggest consideration in the building of Canadian roads, and the co-operation of farmers is enlisted by the local municipalities by rebating a certain portion of the taxes. The maintenance of the Dominion roads is another important consideration which is also followed with a progressive program. All principal centres of the Dominion are linked up by modern roadways and a coast-to-coast motor way has been advocated for some time, one by one the gaps in the network are being filled. It will undoubtedly shortly come into existence.

The Death Toll of Speed

Problem Demanding Grave Study by National Lawmakers

Some really startling figures have been presented to the National Safety Council by the United States, which is holding its annual session at Atlantic City. They deal with the rapidly increasing toll of human life that according to George Secretary S. J. Williams, is the price of the modern speed craze. "The motor menace," as he calls it, has become a problem demanding grave study by national and state lawmakers, and by all organizations having to do with the public welfare.

Officials statistics for the current year, according to the report of the Executive of the Safety Council show that "three times as many people are killed by automobiles as are killed in all the factories, mines, railroads and other industries in America." During the last four months one person was killed by automobile in the United States every thirty-five minutes. In that time the deaths from this cause were over five times as great as in number than during the similar period of the previous year.

The fact that over 5,000 persons were carried over the country in the terrible carnage, a British official statement dealing with the commercial development of the aeroplane. It shows that over 5,000 persons were carried over aerial journeys in Great Britain last year with but one fatality. According to the estimates prepared for the council the terrible death toll from automobiles is due almost entirely to reckless driving and care for speed. Ninety-seven per cent of the fatalities are ascribed to these two causes. But because the killings have increased in an even greater proportion than have the number of automobiles in use the Council believes the situation should be given immediate consideration by the automobile makers of the country, unless they expect soon to be confronted by a great volume of hostile public opinion.

It must be clear that such a staggering death rate cannot continue without causing unusual action. Safety legislation can be tightened and strengthened, but legislation cannot do everything. The great need is for the development of a strong and efficient sentiment among owners of automobiles themselves against the reckless driver and the speed fiend.—Toronto Globe.

Tip-Burn Disease On Potato Plants

Growers Often Mistake Trouble For Late Blight

A trouble which is widely distributed and very prevalent in some seasons and to which the name "tip burn" has been given, is to be found among our potato crops. This trouble takes the form of a gradual burning and drying of the leaves of the plants, often commencing at a comparatively early stage in their growth and, in many cases, if allowed to go unchecked, slowly but surely involving the whole of the plants so that they die down a considerable time before the tubers are developed.

The appearance of this trouble in the fields is often mistaken by growers for late blight. There is, however, a marked distinction between the two, for late blight may commence by attacking any part of the plants—leaves and stems alike—has a dark, water-soaked appearance, and, in its early stages is damp to the touch, while tip burn invariably commences at the margin or tips of the leaves and is decidedly dry to the touch and with the exception of after rain. It also appears much earlier in the season than late blight, although evidence has been obtained that in seasons when it is severe and where no effort is made to check it, a considerable reduction in the yield of marketable tubers, due to the premature death of the plants from this cause, may result.

Investigations of this trouble are not yet in agreement as to the cause. The observations of some have led to the belief that a period of hot, dry weather during the growing season causes the leaves to throw off moisture more rapidly than it can be furnished by the plant, the result being the appearance of tip burn. This belief seems, however, to be dispelled by the fact that the trouble is not found in the hot regions of the west, where the temperature often becomes excessive and the air is especially dry.

More recent investigations lead to the belief that this burning of the leaves probably follows the depredations of the insect known as the potato leaf hopper. These investigations are not yet complete, but enough evidence has been produced to serve as a warning to potato growers to keep these insect pests well under control in an endeavor to avoid tip burn.

We have found in our experimental work with potatoes that Bordeaux mixture will, to a large extent, control this trouble. In 1918, when it was extremely prevalent, we had several plots of potato stock—both of experiment, Bordeaux mixture was not applied. These plots suffered from a severe attack of tip burn and the plants were all killed down by the second week in August, while other plots on the same land, and to which, for the control of late blight, Bordeaux mixture was regularly and thoroughly applied, suffered to a very slight extent only, the plants remaining green until the end of September. This mixture acts as a repellent to the leaf hopper, as well as a protection to the plants. Many other cases in addition to that referred to have come to our notice bearing evidence that regular and thorough spraying with this mixture will reduce to a minimum the ravages of tip burn.

Asst. Plant Pathologist.

Five Million War Prisoners

A Berlin wireless despatch says, according to a League of Nations statement, the governments interested in the fate of the 5,000,000 at the disposal of Mr. Fridtjof Nansen for the repatriation of the large numbers of prisoners of war still in Russia, Siberia and Turkistan.

Scientific Methods In Farming Will Tend To Eliminate the Risks

Unlike the old lady who lived in the village of the University of Saskatchewan, has not so many children that it does not know what to do with them—every one. The child attending the rural school, the growing and the eager young man bent on a profession, the mother, the father—all in one way or another, are nourished by that good mother of the province, the University at Saskatoon.

Reallizing that, comparatively speaking, a few of her children can actually attend her institution, the university does everything possible to cater to the needs of those who cannot, for our reason or another, undertake a college course; and just as in olden days, when there were no schools, intellectual culture spread from a rich family to the poor, and generation the University endeavored to distribute its spiritual bounty as liberally and as widely as possible. It is with this ideal in view that the benefits of the university should be freely shared and its usefulness increased, that three functions what is known as the Extension Department, the distributing agency, as it were, of the splendid agricultural college which has been organized during the last decade at Saskatoon, an agricultural college even now ranking among the foremost on the North American continent.

The scope of the activities of the extension department may be gathered from a glance at some of its undertakings. These include agricultural exhibitions, plowing matches, standing crop competitions, spring stock shows, seed fairs, poultry and rabbit shows, and the like. In short, the extension department is everywhere. All this in addition to many other things, such as the holding of the last decade at Saskatoon, an agricultural college even now ranking among the foremost on the North American continent.

As a general rule the extension department carries through the agricultural societies of the province, and last year under the joint auspices, some 125 agricultural exhibitions were held, while this year the number will approximate 150. It is from the university that the judges are drawn for the exhibitions, two experts being generally sent, one to place the awards in the horse classes, the other to judge cattle, sheep and swine. In the case of the poultry and rabbit shows, the judges are usually drawn from the ranks of the university.

The extension department is always glad to bring home to the farmer that his profession is a craft, and as such demands an appreciation of the essential underlying factors. As to the farming efficiency, raising of the standard of produce, intelligent policies in the matter of seed, and the like, the extension department endeavors to inculcate. To this end the findings of the agricultural colleges, which are placed at the disposal of the extension department, are always available.

Believing in the stimulating value of the extension department, the university organizes plowing matches, standing crop competitions, and seed-fairing. This year these figures have been well surpassed. The inferior crops of 1919 reduced the number of standing crop competitions considerably, and also brought the number of seed fairs below the average. Of the latter however, some 30 took place, and the majority of the reports (two judges were sent in each case) show that the exhibits were of a high and uniform quality.

The purpose of the seed fairs is to demonstrate the value of pure seed and to encourage its more general use, as well as to bring together the man who has such seed to sell and the man who wants to buy. Interest in the seed drilling competition (only recently begun) is growing, and as against three in 1919, some half a dozen were conducted this year. On account of the interest it creates in good workmanship, the value of the competition is an invaluable means to better farming.

Of short courses in agriculture, 41 were held in 1919, and this year the number was considerably increased. The attendances, too, show a marked increase, while the interest taken in the lectures is keen and appreciative. In addition to the courses, speakers were provided by the university extension department last year for upward of 25 local meetings of farmers, including annual meetings of agricultural societies, agricultural society banquets, grain growers meetings, meetings of debating clubs, etc.

Through the short courses, seed fairs and miscellaneous meetings, the extension department has been

able to the University of Saskatchewan, has not so many children that it does not know what to do with them—every one. Want Higher Charge For Storing Grain

Fort William and Port Arthur Terminals Would Raise Charges

Increases in the tariff charges for elevating and storing straight grain were asked on behalf of the Fort William and Port Arthur terminal elevators by J. C. Gage, in an application made to the Board of Trade Commissioners for Canada. He asked that the present one cent per bushel for elevating and storing straight grain be increased to one and one-quarter cents. Reasons given were the increased cost of operation over other grain.

Fred W. Riddle, Saskatchewan Co-operative Elevator Company, supported the application and asked that a period of free storage be granted of 10 to 15 days. Mr. Gage also applied for an increase in the rate for storing mixed grains and screenings. The increase asked for is from two to three cents for mixed grains and three to four cents for screenings.

Worse Than a Car

Destruction and Death in the Wake of the Rule of Lenin

Lenin has been called an "inverted czar." But this is too much. No czar ever inflicted such misery upon so many millions of people as has the fanatic and remorseless Lenin. The official reports of his own agents show how destruction and death have followed in the wake of his theories. There is no real government in Russia; solely a ruthless dictatorship. No laws are passed; only arbitrary decrees are issued. There are no courts; merely the ferocious revolutionary tribunals continue to confiscate and execute. Talk of the worst of the czar! He clattered by with his Lenin flies with scorpions.—New York Times.

Discovery of Salts

A discovery, the value of which is not known, but is being investigated, has been made at a point between the north of Vancouver and Skeena by a party of gentlemen visiting the district of a deposit of crystalline salts. The area which is covered by the deposit is estimated to be about 200 acres. The greater portion of it is covered by about six inches of salt, and though a hole was excavated to a depth of three feet the bottom of the deposit was not reached. The salts will be analyzed to ascertain the commercial value.

"Is your husband having any luck with his garden?" "Oh, yes. He got a sunstroke and collected \$200 from a health insurance."—Boston Transcript.

Making Life on The Farm Appealing

Good Roads and Cheap Automobiles Should Play a Good Part

Since the war a problem which has been worrying agriculturists all over the country is that of keeping the boy and the girl on the farm. All the literature that I have seen on this subject shows quite plainly that the panacea has been discovered to meet the difficulty in connection with the roads and the automobiles. I think that the boy and the girl will all agree that we can at least go a long way towards solving the problem by adopting better farm methods; by making the home more attractive; by keeping better livestock; by making more profit on the land; and by making the conditions more comfortable conditions such as will be conducive to happiness and contentment. The farmer's wife, and generally by doing everything we can to make life on the farm appealing. In addition to this I think that good roads and cheap automobiles should play a great part in helping to keep the young people on the farms by rendering very valuable assistance to the farmer in different ways in connection with his work and by enabling him and his family to move about and mix with the neighbors without obtaining some special pleasure out of it.—Hon S. F. Tolmie, in the House of Commons, May 14, 1920.

Mennonites Obeying Law

Figures for School Attendance Are Higher Than Last Year

According to Premier Martin the latest reports reaching the Department of Education regarding the situation in the Mennonite settlements in the West Current show a considerable improvement and figures for school attendance are much higher than last year. This is the result of any change of heart on the part of the Mennonites, but comes from the stern measures adopted by the government to compel the Mennonites to obey the education laws of the province. The Premier says that no little difficulty has been experienced in enforcing these laws, as many of the settlers prefer to spend ten days in jail rather than pay the insignificant fines imposed.

"Landlord, there are always a lot of strangers in my bathing room."

"Yes, madam. I'm sorry, but—"

"Well?"

"Your yotes do not include exclusive use of the ocean."

The Returned Soldier On The Farm

Work Accomplished by Calgary Branch of Soldier Settlement

Two thousand returned soldier farmers, occupying 40,000 acres of land in Southern Alberta, have been placed by the Calgary branch of the soldier land settlement board since February, 1919, according to the assistant superintendent of the board. The sum of \$11,286,000 has been loaned to the settlers for the purchase of land, stock and equipment, \$8,000,000 having been paid out in 1919, when the demobilization and re-establishment of returned soldiers was at its height, and the sum of \$3,286,000 since the first of January.

A north of Ireland man went into a post-office and handed over a telegram addressed to a remote part of Ireland. The post-office clerk informed him that the charge would be one shilling and sixpence.

"How do you make that out?"

"Ninety-four for the wire, and a shilling for postage and delivery outside the radius."

"That be hang'd!" retorted the hard-headed Irishman. "You send me a telegram and I'll write and tell you to fetch it!"

Winding is to put your trust in Providence, but it's unwise to go around looking for holes for Providence to pull you out of.

Group taken at the Farm Boys' Camp, 1919. One of the main buildings of the Saskatchewan University in the background. The number of boys who attended the Farm Boys' camp this summer was 175; at Regina there were 245 farmers of tomorrow.

No Respecter of Persons

A Scotch policeman in London was keeping the crowd away in front of the milliners' A stout excited woman endeavored to pass but he restrained her.

"I'm the wife of a cabinet minister," she insisted. "You must let me pass!"

The Scot eyed her unimpressed. "Madam, ye couldna pass if ye were the wife of a Presbyterian minister!"
